KS GRAB

The KS is a grab for normal excavation work. The large spread when the grab is open makes this type very suitable for loading and unloading bulk materials such as sand, powder and gravel. Standard equipped with a reinforced cylinder, which means that the grab has a very good capability to penetrate. A non-return valve, available as a separate accessory, can be fitted.

This grab has very low maintenance requirements and is very durable.

Accessories: non-return valve, suspension plate, ejector, link, rotator.

Type	Blade length	Capacity	Weight	Working pressure	Grabbing force
KS 55	570 mm	300 ltr	270 kg	250 bar	30 kN
KS 65	670 mm	350 ltr	285 kg	250 bar	30 kN
KS 80	820 mm	430 ltr	305 kg	250 bar	30 kN
KS 90	920 mm	490 ltr	320 kg	250 bar	30 kN
KS 100	1020 mm	540 ltr	340 kg	250 bar	30 kN
KS 120	1220 mm	650 ltr	380 kg	250 bar	30 kN
