

# MDG GRAB

Bakker Hydraulic Products bv

The MDG is a grab bucket, which is suitable for normal, light-duty digging in sand and clay and is considered an exchangeable equipment within the scope of the machinery directive 2006/42/EC. Be sure that the machine, of which this grab will be part of, meets the appropriate requirements and/or regulations and is well maintained. As this grab can be equipped with weld-on hooks it is also possible to lift goods. The user has to use approved hoisting equipment (chains, hoisting hooks etc.).

Accessories: rotator, suspension plate, weld-on hooks (1000 kg), side plates and an extension (for deep digging).

Type	Blade length	Capacity	Weight	Working pressure
MNG 50	500 mm	195 ltr	140 kg	200 bar
MNG 60	600 mm	210 ltr	150 kg	200 bar
MNG 70	700 mm	225 ltr	160 kg	200 bar
